01 — Welcome to DeepBio Academy

Welcome to one of the most exciting student programs in biotech and bioinformatics education space in Bangladesh. By joining the DeepBio Ambassador Program, you have taken a step that most students never do — you have chosen to lead, to build, and to grow.

DeepBio was founded with a single mission: to make world-class life sciences and bioinformatics and computational biology education accessible to every motivated student in Bangladesh, regardless of their institution or background. We believe the next generation of biotech researchers, data scientists, and innovators are already sitting in university classrooms across this country. We just need to reach them.

That is where you come in.

What DeepBio Does

DeepBio offers structured online courses, bootcamps, and services in:

- Bioinformatics and Computational Biology
- Python and R programming for Life Sciences
- AI in Biology
- Research Skills, Scientific Writing, and Career Development

Our programs are designed for students in **Life Sciences**—exactly the disciplines most underserved by existing Bangladeshi education platforms.

This handbook is your complete guide. Read it fully before you begin. It covers every aspect of the program — what you need to do, how you will be evaluated, what you will earn, and how to get support when you need it.

02 — About This Program

The DeepBio Campus Ambassador Program is a one-year structured program. It is designed for motivated students who want to make a real contribution to bioinformatics research and education in Bangladesh while accelerating their own academic and professional growth.

Program Duration

Detail	Information
Program period	one full year
Monthly commitment	Approximately 8–10 hours per month
Reporting deadline	5th of every month
Review turnaround	Within 7 working days of submission
Certificate issued	At end of program

Who Can Apply

This program is open to students currently enrolled at any Bangladeshi university, from 1st year to final year, as well as MS and MPhil students. Eligible departments include:

- Biology and Botany
- Pharmacy and Pharmaceutical Sciences
- Microbiology
- Biochemistry and Molecular Biology
- Genetics and Biotechnology
- Bioinformatics
- Computer Science and Engineering (CSE)
- …any life science background

Program Philosophy

This is not a passive sponsorship. DeepBio does not give free course access in exchange for nothing. This is a working program where you earn your benefits through real, verifiable contributions to your university community.

We believe this approach is better for you too—because the skills you build as an ambassador (communication, event organization, content creation, community leadership) are exactly the skills that will set you apart in your career.

03 — Your Responsibilities

As a DeepBio Campus Ambassador, your work falls into three core areas. All three are required. You may choose how much effort you put into each, but there are minimum requirements for all of them.

Area 1 — Marketing & Promotion

You are the voice of DeepBio at your university. Your job is to make sure students in your department and university know that these courses exist.

- **University group posts:** Share DeepBio course announcements and updates in Facebook groups, club forum, and LinkedIn groups at your university. Minimum 10 posts per month.
- **Personal social media:** Post about DeepBio on your own Facebook or LinkedIn profile. Minimum 10 posts per month.
- **Referral link sharing:** Use your unique referral link in all promotions so enrollments can be tracked to you.
- **Physical promotion:** Put up flyers or posters on department notice boards when relevant.

Area 2 — Content Creation

Beyond posting, you need to create at least one piece of original content each month. This makes your promotion more effective and builds your personal brand. You can choose from:

- **Video (recommended):** A 60–90 second video about your learning journey, why you chose DeepBio, or an intro to a topic you are studying. Post on Facebook, LinkedIn, or YouTube.
- **Written post:** A 200+ word article about bioinformatics, computational biology, biotech careers, or your DeepBio experience. DeepBio blogs are ideal.
- **Flyer or infographic:** A designed promotional image shared in your personal profile (Facebook, LinkedIn, and All DeepBio Channels). Must include DeepBio branding.

Area 3 — Events & Workshops

You must organize at least one free introductory workshop per semester at your department. This is a core requirement of the program and is directly tied to your course access milestones.

- The workshop can be a seminar, a hands-on session, or a career talk—if it introduces students to DeepBio or to the fields it teaches
- Minimum attendance: 15-20 students
- You must submit at least 3 event photos and an attendance record

Area 4 — Student Support

- Act as the first point of contact for students who have questions about DeepBio courses and services. You do not need to know everything — just be responsive and direct students to:
- academy@deepbioltd.com (for courses inquiry)
- services@deepbioltd.com (for services inquiry),
- info@deepbioltd.com (for general inquiry)
- …or anything you cannot answer.

04 — What You Earn

Your benefits are earned progressively. The more you contribute, the more you receive. Nothing is given upfront — everything is unlocked by completing verified milestones.

Benefit	Detail	When You Get It
5 DeepBio courses	Full access for 1 year (worth BDT 40,000+)	Unlocked in stages (see Section 05)
Ambassador certificate	Official certificate signed by CEO	End of program
LinkedIn recommendation	Personal recommendation from CEO	End of program (top performers)
Research Associate (RA) invite	Join DeepBio research team	Top performers only, year-end
Star Ambassador title	Monthly recognition + special badge on certificate	Monthly top performers

What Makes an RA Invitation

The Research Associate invitation is the most prestigious outcome of this program. It is not guaranteed — it is awarded to ambassadors who demonstrate all of the following by the end of the year:

- Consistent performance across all 12 months (average score 75/100 or above)
- At least 2 workshops organized during the year
- 25 or more verified referral enrollments during the year
- Original content creation every single month without fail
- No warnings or program violations on record

Important: Benefits are tied to active participation. If you are removed from the program, all course access is revoked. Courses are not transferable or refundable in any form.

05 — Course Access: How It Works

Course access is unlocked in three stages based on your verified contributions. You do not receive all 5 courses on day one. This staged system ensures that access is earned, not assumed.

Phage 1 — Onboarding

To unlock Course 1, complete all four onboarding tasks within your first 7 days:

Task	What to Submit
Post a public 'I joined DeepBio' announcement on LinkedIn and Facebook.	Screenshot of live post
Share DeepBio intro in Facebook groups	Screenshot of both posts
Follow DeepBio on Facebook and LinkedIn, like/share 1 post	Screenshot of follow + engagement
Submit your Ambassador Profile Form (social handles, research profiles)	Form submission confirmation

Phage 2 — Month (1-2)

To unlock Courses 2 and 3, meet the following by end of Month 1 and 2:

- **8 posts** (links required, minimum 2 per week)
- **2 personal social media posts** (public, links required)

- **Minimum 2 referral link clicks** (verified via Bitly/TinyURL dashboard screenshot)
- **1 piece of original content** (video, written post, or flyer — your choice)

Stage 3 — Month 3-4 (Cumulative)

To unlock Courses 4 and 5, meet the following cumulative totals by the end of Month 3 and 4:

- **12 total university group posts** across 3 months
- **6 total personal social media posts**
- **5 total students enrolled** using your referral link
- **1 workshop organized** at your department
- **At least 2 pieces of original content**

If you miss a stage deadline: You will receive one warning and a 7-day extension. If the tasks are still not completed, course access for that stage will not be unlocked until the following month's review.

06 — Marketing Guidelines

Good marketing is honest, helpful, and consistent. Your goal is not to spam — it is to genuinely help your fellow students discover something valuable.

What to Post

- **Course announcements:** New course launches, enrolment deadlines, discount windows
- **Career information:** Why bioinformatics matters, job opportunities, research paths
- **Your own experience:** What you are learning, what surprised you, what you found useful
- **Event promotions:** Announce your upcoming workshops or study sessions
- **Student testimonials:** Share feedback from classmates who enrolled (with their permission)

How to Post Effectively

- Write in a genuine, personal voice — not like an advertisement
- Always include your referral link so interested students can enrol directly
- Post at times when students are active: evenings and Friday afternoons tend to get the most engagement
- Use a clear image or the DeepBio-provided flyer to make your post visually stand out
- Tag the group or community in your post when allowed

Minimum Monthly Requirements

Activity	Minimum Per Month
University forum/group posts	4 posts (links required)
Personal Facebook or LinkedIn posts	2 posts (links required)
Referral link shared in posts	Every post must include your link
Bitly dashboard screenshot submitted	1 per month

What Not to Do

- Do not copy-paste the same message across groups without any personalisation — this gets ignored and may get you removed from groups
- Do not make claims about courses that are not accurate — always stick to what DeepBio actually offers
- Do not post DeepBio content on pages or groups unrelated to science, education, or careers
- Do not ask people to click your link just to inflate your Bitly count — only genuine sharing counts

07 — Content Creation Guidelines

Content creation is what separates a great ambassador from an average one. When you create original content — a video, an article, an infographic — you are building something that reaches people even when you are not in the room. It also builds your own professional profile in a way that generic social media posts never will.

Option A — Video Content (Recommended)

A 60–90 second video posted on Facebook, LinkedIn, or YouTube. Ideas include:

- Why I chose to study bioinformatics
- What I learned from DeepBio's Python for Biology course

- 3 careers you can build with a biology degree + coding skills
- What is genomics? (explained in 60 seconds)

You do not need professional equipment. A smartphone, good lighting, and a quiet room are enough. **Authenticity matters more than production quality.**

Option B — Written Blog Article

A 200+ word post on LinkedIn or a personal blog. Ideas include:

- My experience with DeepBio Academy — what I liked, what I learned
- How to start a career in bioinformatics from Bangladesh
- Why every pharmacy student should learn Python
- My roadmap for getting into computational biology research

Option C — Flyer or Infographic

A designed image created in Canva or similar tools, shared in at least 3 university groups. Must include:

- DeepBio Academy name and logo
- Course name or event being promoted
- Your referral link or QR code
- A clear call to action (enrol now, register here, etc.)

Content Requirements Summary

Content Type	Minimum Requirement
Video	1 per month if choosing this option (60–90 sec, public)
Written post	1 per month if choosing this option (200+ words, public link)
Flyer or infographic	1 per month if choosing this option (shared in 3+ groups)
Overall minimum	At least 1 piece of content per month in any format

Tip: Ambassadors who post video content consistently tend to score 15–20% higher on their monthly evaluations and report more referral enrolments from their personal network.

08 — Events & Workshops

Organizing a workshop is the highest-impact activity you can do as an ambassador. A single 90-minute session at your department can introduce 30–50 students to bioinformatics and generate more genuine interest than weeks of social media posting.

Minimum Workshop Requirement

You must organize at least one workshop per semester. That means a minimum of two workshops over the full program year. Workshops must be:

- Free for all attendees
- Held at your university department or a university venue
- Attended by a minimum of 15 students
- Focused on an introductory topic related to bioinformatics, biotech, or DeepBio courses

Workshop Ideas

- Introduction to Bioinformatics — What is it and why does it matter?
- Getting Started with Python for Biology Students
- Career Paths in Genomics and Computational Biology
- How to Start Research in Bioinformatics from Bangladesh
- Live demo session: Using NCBI, BLAST, or sequence analysis tools

How to Organize a Workshop

1. Choose a date and book a venue (seminar room, classroom, or department hall)
2. Announce the event at least 7 days in advance via WhatsApp, Facebook, and physical posters
3. Prepare a 45–90 minute session plan — you can use DeepBio introductory materials
4. On the day, collect a sign-in sheet (name + student ID + contact)
5. Take at least 5 photos during the event — include at least one with a visible 'DeepBio Academy' sign or banner
6. Submit all proof in your Monthly Report Form within 7 days of the event

What to Submit After a Workshop

Proof Required	Details
Event announcement post link	The Facebook or WhatsApp post promoting the event
Minimum 3 event photos	Upload to Google Drive, submit link (anyone with link access)
Sign-in sheet photo	Shows attendee names and count

Event date and venue	Written in the Monthly Report Form
Number of attendees	Self-reported, verified against sign-in sheet

09 — Monthly Proof Submission

Every month, you must submit your proof of work through the official Monthly Report Form. There are no exceptions. No submission means no review, which means no course unlock and no score for that month.

Submission Deadline

Deadline: 5th of every month. Late submissions will not be reviewed for that month and will count as a missed month.

What You Must Submit

Proof Type	How to Submit
Facebook group post links	Paste direct URL of each public post
Personal social media post links	Paste direct URL of each post (must be public)
WhatsApp group post proof	Upload screenshot to Google Drive, paste shareable link
Bitly dashboard screenshot	Upload to Google Drive, paste link (shows your click count)
Video content link	Paste URL of Facebook / LinkedIn / YouTube video
Written post link	Paste URL (LinkedIn article, blog, etc.)
Event photos	Upload folder to Google Drive, paste shareable folder link
Event announcement link	Paste URL of the promotion post

What Counts as Valid Proof

- **Posts must be public:** Private posts or posts in closed groups that cannot be verified will not be counted
- **Screenshots must show full context:** Group name, your name, post content, and date must all be visible in one frame

- **Google Drive links must be set to 'anyone with link':** If we cannot open your link, we cannot verify it — and it will not be counted
- **Dates must match the submission month:** Posts from previous months cannot be resubmitted

Verification Process

After you submit, DeepBio admin will:

7. Verify all post links are live and public
8. Cross-check Bitly clicks with the admin-side Bitly dashboard
9. Review event photos for authenticity
10. Score your submission (see Section 10)
11. Update your status in the Master Tracker and send you a WhatsApp notification within 7 working days

Zero-tolerance policy: Submitting falsified, edited, or fabricated proof will result in immediate removal from the program with no appeal. This includes edited screenshots, fake post links, or re-using the same content across months.

10 — Scoring & Leaderboard

Each monthly submission is scored out of 100 points by the DeepBio admin team after verifying your proofs. Your score determines your leaderboard ranking, Star Ambassador eligibility, and ongoing course access.

Monthly Scoring Breakdown

Activity	Points Available
University group posts (up to 4 verified posts)	25 points
Personal social media posts (up to 2 verified posts)	15 points
Referral link clicks (verified via Bitly)	20 points
Original content created (video / written / flyer)	25 points
Workshop or event organized	15 points

Total	100 points

Score Tiers

Score Range	Status & Consequence
80 – 100 points	**Star Ambassador** — eligible for monthly recognition and year-end RA consideration
60 – 79 points	Active — good standing, all course access maintained
40 – 59 points	Warning — written notice sent, must improve next month
Below 40 points	At risk — second consecutive month below 40 leads to removal

The Leaderboard

A leaderboard is maintained and shared in the Ambassador WhatsApp group at the end of each month. It shows:

- Top 5 ambassadors by monthly score
- Top ambassador by referral enrollments
- Top ambassador by content pieces created

Being on the leaderboard is not just recognition — it signals to DeepBio leadership that you are a candidate for the RA position and LinkedIn recommendation.

Referral Scoring Detail

Your referral score is calculated based on verified Bitly clicks and confirmed course enrollments. The 20 points for referrals are distributed as follows:

Referral Performance	Points
0–4 clicks, 0 enrollments	0 – 5 points
5–14 clicks, 1–2 enrollments	6 – 12 points
15–29 clicks, 3–4 enrollments	13 – 17 points
30+ clicks or 5+ enrollments	18 – 20 points

11 — Do's and Don'ts

This section summarises the key rules of the program. Read it carefully. Violations are taken seriously and can result in warnings or removal.

Always Do

- Submit your Monthly Report Form by the 5th of every month without fail
- Make all promotional posts public so they can be verified
- Use your unique referral link in every post that promotes DeepBio
- Take proper screenshots showing group name, your name, content, and date
- Set all Google Drive links to 'anyone with link' before submitting
- Respond to student questions about DeepBio honestly and direct complex queries to deepbiobd@gmail.com
- Notify your program coordinator in advance if you face a genuine difficulty completing tasks in a given month
- Represent DeepBio professionally in all public communications

Never Do

- Submit fake, edited, or fabricated screenshots or post links — this is immediate grounds for removal
- Resubmit the same post links or photos across multiple months
- Make false claims about DeepBio courses, pricing, or outcomes
- Share DeepBio content in groups unrelated to science, education, or student communities
- Ask students to click your referral link without genuine interest — click farming is detectable and constitutes fraud
- Publicly criticise DeepBio Academy or its instructors on social media
- Share confidential program information (scoring details, ambassador contact lists) outside the program
- Miss 2 consecutive months without prior communication — this triggers automatic removal

Consequences at a Glance

Violation	First Occurrence	Repeat Occurrence
Missing monthly submission	Friendly reminder	Warning issued
Score below 40 two months in a row	Warning + 7-day plan	Removal from program
Fake or fabricated proof submitted	Immediate removal	Permanent ban

Missing workshop for full semester	Warning	Course access paused
Public misrepresentation of DeepBio	Warning + correction required	Removal from program

12 — Support & Contact

We want you to succeed. If you are struggling with any part of the program — whether it is finding time, dealing with low engagement in your university, or simply not knowing what to post — reach out. We will help.

Contact Information

Channel	Details
General enquiries	info@deepbioltd.com
Program website	deepbioltd.com/ambassadors
Course platform	deepbioacademy.com
Ambassador WhatsApp group	Link shared upon onboarding
Monthly Zoom call	Last Friday of every month — link shared in chat group

Monthly Ambassador Call

Every month, DeepBio hosts a 30-minute Zoom call for all active ambassadors. This is your chance to:

- Ask questions and get answers from the DeepBio team directly
- Hear about upcoming courses and promotions before they are publicly announced
- Learn what is working from other ambassadors across the country
- Get your questions about proof submission or scoring resolved quickly

Attendance is not mandatory but is strongly encouraged. Ambassadors who attend calls consistently tend to perform better because they have more information and feel more connected to the program.

If You Need to Take a Break

Life happens. If you are facing exams, a family situation, or any other genuine difficulty, contact your program coordinator before your submission deadline — not after. One month of approved leave will not count against you. Disappearing without notice is what leads to warnings and removal.

Thank you for being part of DeepBio Academy.

You are not just promoting courses — you are building the next generation of biotech talent in Bangladesh. We are proud to have you with us.
